

# STOREGGA

## WHO WE ARE

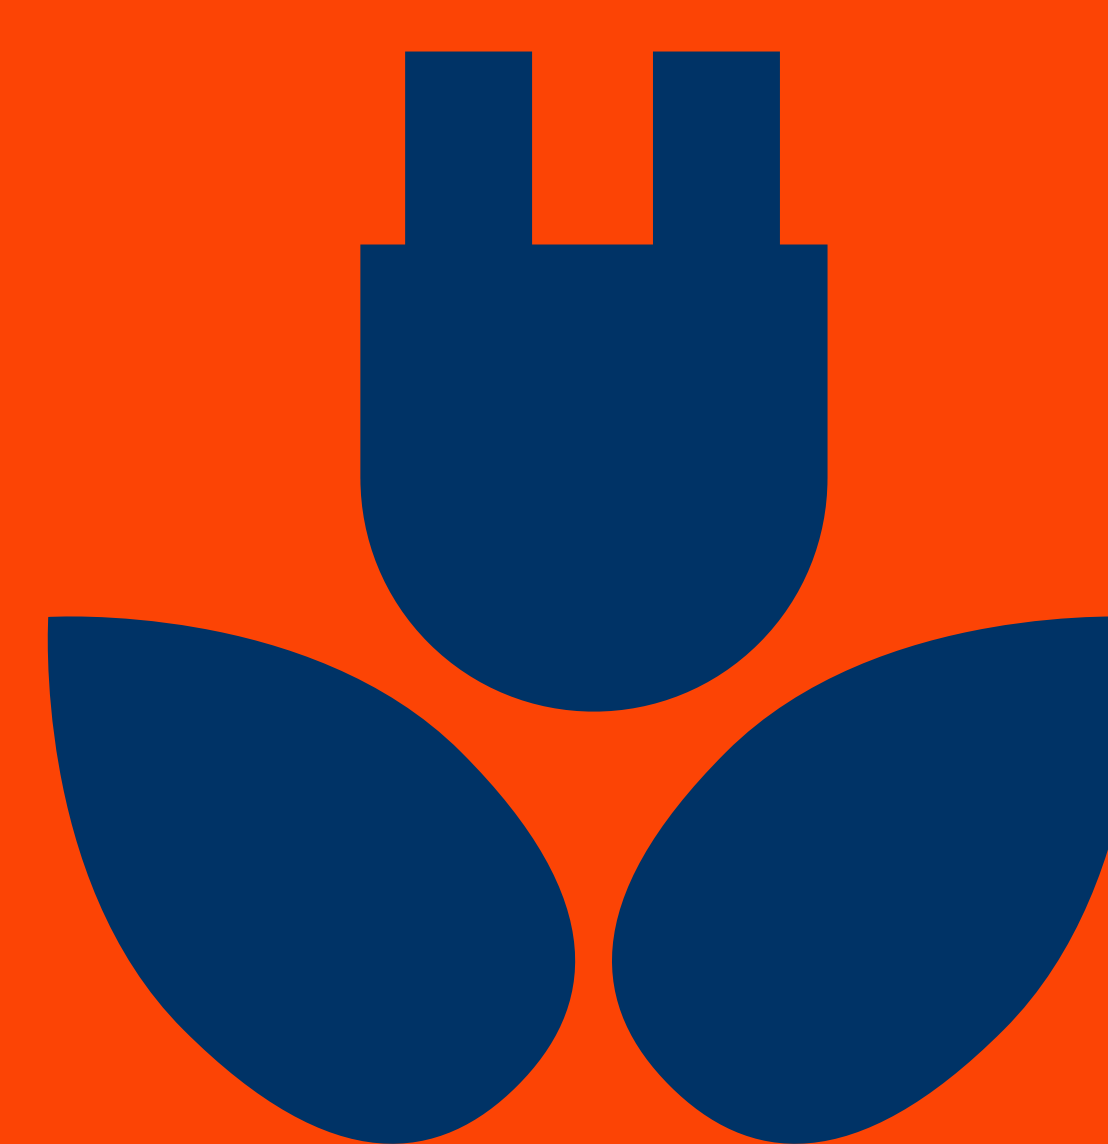

Storegga is an independent, UK-headquartered decarbonisation project developer, dedicated to reducing and removing the harmful impacts of carbon dioxide (CO<sub>2</sub>) in the atmosphere.

Since its inception in 2007, Storegga has established a local, national, and international presence, leveraging expertise from oil and gas, whisky distilling and other industries to pave the way towards net zero solutions.

With a portfolio of carbon, capture and storage (CCS) and hydrogen projects in the United Kingdom, the United States and Norway, Storegga is advancing industrial decarbonisation in sectors such as manufacturing, power generation, distilling, chemicals and others. Storegga is developing the Acorn CCS and Cromarty Hydrogen projects in Scotland, Trudvang CCS in Norway and Harvest Bend CCS in Louisiana, USA.
